- 6) ☐ Other: \_\_\_\_\_.

**ELECTION/RESTRICTION**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to nucleic acids, oligonucleotide probes, and methods of detecting bacteria.

Group II, claim(s) 8-9, drawn to a bacterium.

2. It is noted that while claim 9 includes a reference to claim 6, the claim is drawn to a "bacterium belonging to *Psychrobacter pacificensis*." Accordingly, the claim has been included in Group II.

3. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

It is noted that unity of invention exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding special technical features. The expression "special technical feature" is defined in PCT Rule 13.2 as meaning those technical features that define a contribution that an invention considered as a whole makes over the art. In the instant case, a shared special technical feature is lacking. It is noted that the bacterium of Group II includes, among many other components, nucleic acids comprising SEQ ID NO: 1. However, Group I is drawn to specific nucleic acid fragments and probes that function in detection

of target sequences, while Group II is drawn to a complex, living microorganism composed of a myriad of different biomolecules. Further, the products of Group I include oligonucleotide probes that comprise any "part of" SEQ ID NO: 1. Accordingly, Group I is sufficiently broad so as to encompass, e.g., random decamers, which are well known in the art. Thus, the products of Group I do not make a contribution over the art. As Groups I-II do not share a special technical feature, unity of invention is lacking.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
